RE: Quick Crime Solvers Tip for the May 24, 2003 murder on the 9100 block of Poplar Ave. in Takoma Park, MD.

A man identifying himself as Jay Pendelton, Jr. confessed to hiring and paying a hitman who committed this crime. I'm not sure if Jay provided his real name, his true confession, or his true work address (5th floor, FBI SID (Special Investigation Division) building, 3525 5th St, Arlington, VA.

The full story can be found at www.empowermentresources.com and www.empowermentresources.com/cointelpro_2005.html.
The full text of Jay's confessions can be found at the 7/25/05 and the 7/26/05-8/1/05 pdf or adobe acrobat log files.

I have also had my life threatened by Jay Pendelton for posting this info. (He previously threatened my life for posting any info about his political dirty tricks team scandal, which is very similar to the old FBI COINTELPRO political dirty tricks of the 1960's and 1970's).

I will try to update my website and provide the information in a more concise, police reader-friendly manner, but all of the basic info can be found at www.empowermentresources.com/cointelpro_2005.html and the data log files, primarily the 7/25/05 and the 7/26/05-7/27/05 data log files.

At this point, I am providing crimesolving tips, not a fully documented open and shut case. I believe it would be well worth the police's time to visit and question Jay Pendelton at 3525 5th St., Arlington, VA. I recommend that the police first review the PDF files and keep an open mind concerning
1) the possibility that renegade elements of the FBI are up to the same type of illegal and unconstitutional dirty tricks that they were up to 30-40 years ago from 1965-1975, and
2) that, with a huge secret "intelligence community" black box secret budget, they may well have some very powerful 21st century technology to monitor and harass (and even attack) people with.

It might also be that someone is impersonating an FBI agent, in which case the FBI might get very concerned and might want to take all appropriate steps to maintain its reputation and integrity.

Thank you very much for doing all you can to help follow up on this crime lead. According to Jay Pendelton's confession, I was almost killed in a prior hit attempt (that I reported as an armed robbery to the Takoma Park police probably in March or April 2003, case #03-6250), so I would really appreciate your doing all you can to help solve this murder before anyone else (particularly myself) is killed.

Sincerely,
Edmund H. Harding
